8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____

Reasons for Allowance

1. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious the claimed AFC recording medium structure.

While the prior art of record disclose multi-layered AFC media structures, the prior art of record fails to recognize the synergistic effect that attempting to maximize the Mrt of the lower layer(s) results in an increase in medium noise (*page 5 of applicants' response*). As noted by applicants, the "critical requirement of relative Mrt values for the four layers in Applicants' invention results in maximizing the Mrt of the lower layer structure (LL1, LL2 and LL3), and thus minimizing $Mrt_{COMPOSITE}$, to achieve low PW50, while also *increasing* media S_0NR ". As further noted by applicants, the "addition of a fourth layer, which would have a magnetization *parallel* to the magnetization of Layer 1, would be necessity *increase* $Mrt_{COMPOSITE}$ " (*page 6 of response*), hence rendering the claimed invention neither disclosed or rendered obvious by the prior art of record

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
